

Environmental Statement of Helix Industrial Roofing Limited

Both new construction and refurbishment inevitably have some impact on the environment and people surrounding our works – noise, dust, vibration, traffic disruption and similar inconvenience. We at Helix Industrial Roofing Ltd intend to keep the impact to an absolute minimum.

As individual citizens, as a company and as a partnership with our customers, subcontractors and suppliers, we at Helix Industrial Roofing Ltd care for the communities and environments within which we live and work. We fully acknowledge that we have a corporate responsibility in all that we do as a business and we are committed to delivering best practice for our social accountabilities.

We will do our utmost to reduce some of the negative impacts upon our neighbours and their communities resulting from our works and do our best to mitigate any temporary inconvenience brought to customers and the public.

We wish to be recognised as a company that respects people and the environment and aspires to constantly improve our corporate social responsibility toward any person or contractor that may be affected by the activities of our company.

David O'Dowd
Managing Director
